computer communications

Index to Volume 18 (1995)

No 1 (January) pp 1–64
No 2 (February) pp 65–128
No 3 (March) pp 129–224
No 4 (April) pp 225–312
No 5 (May) pp 313–404
No 6 (June) pp 405–460
No 7 (July) pp 461–524
No 8 (August) pp 525–588
No 9 (September) pp 589–692
No 10 (October) pp 693–788
No 11 (November) pp 789–868
No 12 (December) pp 869–1012

Article index

Number 1

Special Issue: 6th IEEE Workshop on Local and Metropolitan Area Networks
Guest Editors: W Lemppenau and R. Popescu-Zeletin, GMD FOKUS, Germany

Performance comparison of media access protocols for Gbit/s networks in the local area
T. Meuser 4
Estimating the quality of service of token passing MAC protocols
R. M. Conti, E. Gregori and L. Lenzini 15
ATM virtual private network design alternatives
P. Crocetti, L. Fratta, G Gallassi, M. Gerla and S. Fotedar 24
Traffic pattern based mobile routing scheme
R. Yuan 32
Performance of shared-channel multihop lightwave networks
M. Kovacevic, M. Gerla and J. Bannister 37
Cryptanalysis of a password authentication scheme using quadratic residues
C.-C. Chang, T.-C. Wu and C.-S. Laih 45
On 'Priority promotion DQDB networks to improve fairness'
I. Bosley, T. Kuchlein, K. Pawlikowski and A. Stewart 48
Correction to 'Throughput efficiency of an enhanced link management procedure'
C. Ward and T. M. Phillips 50

Number 2

Model for flexible configuration of application-oriented communication services
M. Feldhoffer 69
Share-based congestion control scheme for systems of interconnected networks
L. Orozco-Barbosa and N. Hirzalla 79
The BERKOM multimedia-mail teleservice
E. Moeller, S. Manandhar, L. Neumann, J. Rückert, G. Schürmann and S. Thomas 89
The leaky window: a flow and congestion control technique for HS-WANs
C. K. Chirchir and A. E. Kamal 103
Fault detection and diagnosis capabilities of test sequence selection methods based on the FSM model
T. Ramalingham, A. Das and K. Thulasiraman 113
Progress within UK firms towards inter-departmental data exchange in the open system context
W. D. K. Macrosson and R. L. Wickramasinghe 123

Number 3

Special Issue: Multimedia storage servers
Guest Editor: Professor T D C Little, Boston University, MA, USA

Multimedia file systems survey: approaches for continuous media disk scheduling
R. Steinmetz 133
Supporting random access on real-time retrieval of digital continuous media
J. C. L. Liu, D. H. C. Du and J. A. Schnepf 145
Local storage systems for continuous data with heterogeneous timing requirements
T. Pfeifer and A. Blobelt 160
Pipelining mechanism to minimize the latency time in hierarchical multimedia storage managers
S. Ghandeharizadeh, A. Dashti and C. Shahbi 170
Allocation strategies of multimedia data on disk arrays
M. Seo and C. Kim 185
Algorithms for designing multimedia servers
H. M. Vin, A. Goyal and P. Goyal 192
Multimedia information caching for personalized video-on-demand
C. Papadimitriou, S. Ramanathan, P Venkat Rangan and S. SampathKumar 204

Number 4

Inside a trader in global trading
K.-y. Poon 227
Routing names and addresses in the international MHS
A. T. H. van der Voort, A. L. Boonstra and F. H. R. de Thouars 247
Integrated transmission of packetized voice and data on a unidirectional fibre optic bus network
S. S. Alwakeel and M. Ilyas 252
Performance measurements on the Heidelberg audio/video distribution system: methodology and results
A. Cramer, R. Hofmann and N. Luttenberger 262
Recovery approach to the design of stabilizing communication protocols
K. Saleh, I. Ahmad, K. Al-Saqabi and A. Agarwal 276
Fairness issues in the networking environment
C. Douligeris and L. N. Kumar 288
Performance analysis of SDN-specific error recovery procedure
D. Baum and L. Lenzini 300

Number 5

Buffer dimensioning for delay- and loss-sensitive traffic
K. P. Kontovassilis, J. T. Tsiligaridis and G. I. Stassinopoulos 315
On testing and diagnosis of communication protocols based on the FSM model
T. Ramalingam, A. Das and K. Thulasiraman 329
Delay analysis of DQDB networks with slot preuse and reuse
A. R. Pach, S. Palazzo and D. Panno 338
Flow control and routing algorithms in WAPSN
R. C. Betini, H. Kameda and K. Shimizu 345
Hot-spot spanning tree algorithm for a bridged LAN/MAN
N.-F. Huang, G.-K. Ma and Y.-J. Wu 357
Application of a cross decomposition algorithm to a location and allocation problem in distributed systems
C. Y. Lee 367
Design of hierarchical communication networks under node/link failure constraints
D. Saha and A. Mukherjee 378

0140-3664/95/$09.50 © 1995–Elsevier Science B.V. All rights reserved

Verifying the progress properties of a heterogeneous protocol system in an internetworking environment
D. Saha 384
Internal communications in a multiprocessor ISDN PBX
C. Hirsch and L. Rojas 392

Number 6

Special Issue: Electronic document delivery
Guest Editor: Lillian Cuthbert, Infinity Software, NY, USA

A model for document management
H. Kilov and L. Cuthbert 408
Project ELVYN: implementing an electronic journal
J. Knight and C. McKnight 418
From paper to CD-ROM documentation
C. Green 423
Secure distribution of electronic documents in a hostile environment
A. D. Rubin 429
The benefits of using electronic document software
K. L. Wandryck 435
The TREAT laboratory: comparing an electronic commerce experiment at Curtin and Monash universities
C. M. Parker and P. M. C. Swatman 447

Number 7

Image transmission on the DQDB network
S.-k. Kao and B. Mukherjee 463
Object model for hypermedia applications
H. K. Wang and J.-L. C Wu 475
Traffic control at terminal equipment in ATM networks using cryptographic techniques
J.-S. Wu, F.-J. Kuo and J.-F. Chang 486
Analysis and representation of test cases generated from LOTOS
P. Tripathy and B. Sarikaya 493
Computational analysis of an optimal routing strategy in a hierarchical computer communication network
D. Saha and A. Mukherjee 507
Client/server approach versus distributed object-oriented computing on top of OSF DCE
A. B. Schill and M. U. Mock 512

Number 8

Special Issue: Bandwidth management on high speed networks
Guest Editor: Professor N.-F. Huang, National Tsing Hua University, Taiwan, ROC

Bandwidth allocation in fair distributed queue (FDQ) networks
M. Kabatepe and K. S. Vastola 527
Call admission control and bandwidth allocation in a multiservice DQDB network
R. Bolla and F. Davoli 537
Bandwidth allocation for isochronous connections in DQDB using the PA scheme
S.-T. Tsai, T.-H. Lin and C. Qiao 545
The Parallel D-Net
O. Sharon and A. Segall 552
Traffic prediction and dynamic bandwidth allocation over ATM: a neural network approach
W. M. Moh, M.-J. Chen, N.-M. Chu and C.-D. Liao 563
Bandwidth management for high speed LANs using wavelength division multiplexing
B. Li 572

Number 9

Adaptive priority timer control of the SAE LTPB for fair prioritization in military avionics networks
T. Burrage and S. Ward 591
Modelling network profiles
J. Lambert and B. Stéphan 600
Improving the UIOv-method for protocol conformance testing
W.-H. Chen, C. Y. Tang and S. T. Vuong 609
Scalable approaches to load sharing in the presence of multicasting
C. E. Wills and D. Finkel 620
MS4 - a high performance output buffering ATM switch
R. Y. Awdeh and H. T. Mouftah 631
Secure and minimal protocols for authenticated key distribution
P. Janson and G. Tsudik 645
Group commitment protocol based on zero knowledge proofs
T.-C. Wu and T.-S. Wu 654
Bandwidth allocation in wide-band communication networks under two types of priorities
C. Katsinis and A. Constant 657
Link enhancement using constrained range and reduced candidate set searches: a revision
R.-y. Lin and C. Yang 663
HTPNET: a high performance transport protocol
T. S. Chang and I. Gorton 669
Comments on 'Analysis of 1-ROR networks'
A. De and N. Prithviraj 682

Number 10

Special Issue: System support for multimedia computing
Guest Editor: Professor K. Jeffay, University of North Carolina, NC, USA

Membership protocols for distributed conference control
B. Rajagopalan 695
Critical bandwidth allocation for the delivery of compressed video
W.-c. Feng and S. Sechrest 709
Continuous framing mechanism for congestion control in broadband networks
J.-H. Huang and P.-C. Tsao 718
Models and performance of real-time disk access policies
J. C. Yee and P. Varaiya 725
Enforcing application-level QoS by frame-induced packet discarding in video communications
S. Ramanathan, P. Venkat Rangan, H. M. Vin and S. S. Kumar 742
Routing and admission control algorithms for multimedia traffic
S. Rampal and D. S. Reeves 755
Providing end-to-end performance guarantees using non-work-conserving disciplines
H. Zhang 769

Number 11

Special Issue: Beyond intelligent systems
Guest Editor: Dr P. Schoo, GMD FOKUS, Berlin, Germany

Evolution of intelligent network concepts
A. Hansson 793
Market requirements and the functionality of intelligent networks
A. Fricke 802
Future (data) communication networks - the challenge to (public) service providers
K. Jakobs 807
IN and beyond: two approaches to the evolution of INs
R. Gutiérrez, J. Nørgaard and K. Randsted 816
Software architecture for the future information market
M. Chapman, H. Berndt and N. Gatti 825
Service architectures and service creation for integrated broadband communications
S. Triglia, A. Mullery, M. Campolargo and J. Hunt 838
Open distributed processing: an architectural basis for information networks
J.-B. Stefani 849

Number 12

Real-time applications in a CRMA network: a performance analysis
G. Anastasi, M. Conti, E. Gregori and L. Lenzini 871
Asynchronous reservation protocol for variable-sized messages in a WDM-based local network
J. H. Lee and C. K. Un 880
ODA implementation for multimedia teleservices
R. Baier, E. Moeller and A. Scheller 889
Access protection solution for heavy load unfairness in DQDB
L. N. Kumar and A. D. Bovopoulos 896
Construction of checking sequences based on characterization sets
A. Rezaki and H. Ural 911
Formal language for security services base modelling and analysis
D. Trček and B. J. Blažič 921
Modular multicast ATM switching architecture
J.-H. Liaw and C.-M. Weng 929
Remote scheme for password authentication based on theory of quadratic residues
C.-C. Chang, S.-M. Tsu and C.-Y. Chen 936
Network access protocol for hard real-time communication systems
O. Ulusoy 943
Stability and throughput optimization of multichannel slotted non-persistent CSMA protocol
I. E. Pountourakis, E. D. Sykas and E. N. Protonotarios 949
Remote login authentication scheme based on a geometric approach
T.-C Wu 959
Formal description of distributed multimedia systems: an assessment of potential techniques
H. Bowman, G. S. Blair, L. Blair and A. G. Chetwynd 964

On the security of Wu and Yeh's conference key distribution system
T. Hwang, N.-Y. Lee, C.-H. Wang and M.-Y. Ko 978
Performance of PRMA in a mobile radio channel
K. C. Chua, W. M. Tan and K. M. Lye 982
Replay tolerance of authentication protocols
K.-Y. Lam 988
ID-based non-interactive zero-knowledge proof system based on one-out-of-two non-interactive oblivious transfer
Y.-H. Chen and T. Hwang 993

Wireless networking, Routing 32
Modelling
Bandwidth allocation, Priority control 657
Monitoring
Multimedia, Performance 262
MPEG
Video-on-demand, Bandwidth allocation 709
Multicast
Switch architecture, Packet switching 929
Multicasting
Load sharing, Distributed systems 620
Multimedia
Buffering scheme, Disk placement 145
Performance, Monitoring 262
Real-time, Disk access 725
Multimedia applications
Usability, Application layer services 807
Multimedia data
Disk array, Disk allocation 185
Multimedia electronic mail
X.400, Multimedia teleservices 89
Multimedia file systems
Continuous media, Disk scheduling 133
Multimedia information caching
Personalized video-on-demand 204
Multimedia protocols
Multimedia terminals and systems, Video communications 742
Multimedia servers
Admission control algorithm, Disk scheduling algorithm 192
Multimedia storage
Pipelining, Latency time 170
Multimedia teleconferencing
Conference control, Group communication 695
Multimedia teleservices
Document application profiles, Document processing model 889
Multimedia electronic mail, X.400 89
Multimedia terminals and systems
Video communications, Multimedia protocols 742
Multimedia traffic
Admission control, Routing 755
Multiprocessor communication
ISDN PBX, Distributed systems 392
Multistage interconnection networks
ATM switching, Deflection-routing 631

Network access protocol
Real-time communication systems, Carrier sense multiple access 943
Network protocols
Network security, Authentication 645
Network security
Computer communication, Authentication protocols 988
Network protocols, Authentication 645
Networks
Node/link failure, Hierarchical design 378
Neural network
Bandwidth allocation, ATM 563
Node/link failure
Networks, Node/link failure 378
Non-work-conserving disciplines
End-to-end performance, Integrated services networks 769
Object orientation
Distributed processing, Client/server 227
Intelligent network, Capability Set 1 816
Object-oriented
Hypermedia, Petri net 475
Oblivious transfer
Cryptographic protocols, User authentication 993
One-way function
Remote login, Password authentication 959
Open distributed processing
Information networks, Binding 849
Open systems
Inter-departmental electronic data exchange 123
Open systems security
Security services base, Security architectures 921
Optical communication
WDM networks, Asynchronous reservation protocol 880
Optimizing scheme
Fairness, Internetworking 288
OSF DEC
Client/server, Distributed workflow 512

PA scheme
DQDB, Harmonic periods 545
Packet switching
Switch architecture, Multicast 929
Passive bus
Folded bus, MAC protocols 552
Password authentication
Remote login, One-way function 959
Performance
Lightwave networks, TDMA 37
Media access protocols, Gbit/s networks 4

Multimedia, Monitoring 262
Protocol, DQDB 463
Protocol, Transmission 252
Performance control
Prioritization, Fairness 591
Performance evaluation
Flow control, Routing 345
Personalized video-on-demand
Multimedia information caching 204
Petri net
Hypermedia, Object-oriented 475
Pipelining
Multimedia storage, Latency time 170
Performance, Transmission 252
Prioritization
Fairness, Performance control 591
Priority control
Bandwidth allocation, Modelling 657
PRMA
Protocol performance, Simulation 982
Protocol conformance testing
Communication protocol, UIOv-method 609
Protocol mismatch
Internetworking, Gateways 284
Protocol performance
Simulation, PRMA 982
Protocols
CSMA, Throughput optimization 949
DQDB, Image transmission 463

Quadratic residues
Remote password authentication, Login request 936
Quality of service
Bandwidth allocation, Real-time applications 871
MAC protocols, Token passing 15

RACE
Intelligent networks, Service architectures 838
Real-time
Bandwidth allocation, Quality of service 871
Multimedia, Disk access 725
Real-time communication systems
Network access protocol, Carrier sense multiple access 943
Real-time constraints
Distributed multimedia systems, Formal description techniques 964
Remote login
Password authentication, One-way function 959
Remote password authentication
Quadratic residues, Login request 936
Routing
Computer communication networks, Hierarchical design 507
Flow control, Performance evaluation 345
Message handling system, Electronic mail 247
Multimedia traffic, Admission control 755
Wireless networking, Mobile computing 32

Security
Cryptography, Authentication 45
Electronic document delivery, Certificate design 429
Security architectures
Open systems security, Security services base 921
Security services base
Open systems security, Security architectures 921
Service architectures
Intelligent networks, RACE 838
Service interactions
Intelligent networks, Three stage method 793
Simulation
Protocol performance, PRMA 982
Software
Electronic document delivery, Survey 435
Software architecture
TINA-C, Standards 825
Standards
TINA-C, Software architecture 825
Storage systems
File systems, Intelligent peripheral devices 160
Subscriber needs
Intelligent network, Market requirements 802
Survey
Electronic document delivery, Software 435
Switch architecture
Packet switching, Multicast 929

Test sequence selection
Fault detection, FSM 113
Fault diagnosis, FSM model 329
Three stage method
Intelligent networks, Service interactions 793
Throughput optimization
Protocols, CSMA 949
TINA-C
Software architecture, Standards 825
Traffic control
UPC, ATM 486
Token passing
Quality of service, MAC protocols 15
Traffic control
Unfairness, DQDB 896
Traffic throughput
Congestion control, Flow control 103
Transmission
Protocol, DQDB 463
Protocol, Performance 252
Transport protocols
High-speed networks, Transputers 669
Transputers
Transport protocols, High-speed networks 669
TREAT
Electronic information, EDI 447

UIOv-method
Communication protocol, Protocol conformance testing 609
Unfairness
Traffic control, DQDB 896
UPC
Traffic control, ATM 486
Usability
Multimedia applications, Application layer service 807
User authentication
Cryptographic protocols, Oblivious transfer 993
Variable dominance
Candidate set search, Constrained range search 663
Video communications
Multimedia terminals and systems, Multimedia protocols 742
Video-on-demand
Bandwidth allocation, MPEG 709
Virtual private networks
ATM, Congestion control 24

Wavelength division multiplexing
Bandwidth management, High speed LANs 572
WDM networks
Optical communication, Asynchronous reservation protocol 880
Wireless networking
Mobile computing, Routing 32

X.400
Multimedia electronic mail, Multimedia teleservices 89

Zero knowledge proofs
Group commitment protocol, Cross product 654
